Progress Report
- Submitted the redesign document.
  - Scoped down our concepts.
  - Minor edits to the motivation, data model, security concerns and user interface.
  - Major edits to the design challenges.
    - User Authentication: Facebook login only.
    - Creator is also a moderator.
    - Privacy Settings: private (only creator and recipients can view) or public (other participants can also view it).
    - Occasion sharing through facebook.
- Implemented the MVP
  - Fully functional persistent application.
  - Facebook authentication.
  - Occasion creation.
  - Some steps towards sharing occasions.
  - Thought creation.
  - Things to be implemented:
    - privacy settings.
    - picture uploading.
    - link sharing.
    - publishing occasions.
    - Editing and deleting occasions/thoughts.

Agenda
- Discuss redesign and any mentor comments. (5 min)
- Discuss MVP and any mentor comments. (5 min)
- Occasion sharing. (5 min)
  - The facebook api seems a little hard to work with.
    - friends vs. invitable friends
    - any recommendations?
  - How should messaging work?
    - any specific api calls?
    - any recommended node.js libraries?
    - any previous experience with something similar?
- Picture uploading. (5 min)
  - How should we go about saving pictures?
    - any relevant resources?
  - How should we go about uploading pictures?
    - any relevant libraries for ui, functionality?
- Overall discussion of the application. (10 min)
  - Will you use this application? What is it missing that would make you use it?
  - Are there any features that you recommend we pursue?
